

FEW TARIFF CHANGES AT SPECIAL SESSION TO BE CALLED SOON TREMENDOUS AMOUNT OF WORK AHEAD OF NEW CABINET WHEN IT IS FORMED — WELLAND CANAL OPENING—PREPARE ALSO FOR IMPERIAL CONFERENCE

Ottawa, Ont., Aug. 4.—(By the Canadian Press)—This is a civic holiday in Ottawa and most of the government departments are closed or carrying on with skeleton staff; however, it is no holiday for Hon. R. B. Bennett engrossed in his cabinet making. Most of the ministers of the King government are also busy clearing their desks. There will be another meeting of the cabinet Wednesday, to have everything in readiness when the new government announces preparedness to take over the business of the country.

The new ministers will be faced with important problems as soon as they take office. One of them is concerning the opening of the Welland Canal.

As stated last week it may be some time before this gigantic accomplishment is officially opened. A number of engineering difficulties have cropped up which, although of a minor nature, may cause a delay from the date of September 1, tentatively selected. However, when the new minister has been selected he will go into it with his deputy minister and a definite date decided upon. Great precaution has to be exercised to avoid any tie-up in the old canal during the autumn rush of grain.

Special Session
The problems devolving on the new ministers to be in readiness for the emergency session of parliament, which is to deal with the unemployment situation, will also be of a pressing nature. The general impression is however that no far-reaching changes will be made in the tariff at next month's meeting of parliament. The policy of the Conservative party in fiscal matters will more likely be brought into effect by the budget of next year.

It is understood that the de-

partment of the King and commerce have both been pressing memoranda for the use of the Canadian representatives at the imperial conference. A new government with a different viewpoint will probably require this memoranda to be considerably amplified. This will no doubt require considerable research.

Wednesday's meeting of the King cabinet will probably have a complete attendance. With the arrival of Hon. Charles Stewart and Hon. W. R. Motherwell on Saturday, all the ministers are back after the elections with the exception of Hon. Ian MacKenzie, minister of immigration and colonization.

What About Massey?
Ottawa, Ont., Aug. 2.—(By the Canadian Press)—The decision of Hon. R. B. Bennett and his new cabinet will make as to whether or not Hon. Vincent Massey is to go to London as high commissioner for Canada, is eagerly awaited. Constitutional lawyers when approached as to what action should be taken, declined to express opinions on the ground that it was a matter of policy, not one governed by any constitutional provision.

Lord Strathcona was appointed by a Conservative government. When the Laurier government came into power, he was retained and remained in office throughout its long term of power. The return of the Borden government brought no change.

When the King government came into power in 1921, Sir George Perle was British high commissioner and Sir George at once asked Mr. King asking to be permitted to resign his post as soon as it would be convenient for the new government to dispense with his services. Premier King later granted Sir George's request.

One of the leading Conservatives here today took the view that there was a difference between a man established in a position and who had all the information to give him an advantage in carrying on and that of a man who has not yet taken over the position.

The appointment of high commissioner for Canada in London is for an indefinite period, during life or during pleasure, it was explained.

ALBERTA GETS RESOURCES OCT. 1

Edmonton, Alta., July 31.—Alberta's natural resources will be formally handed over to the province on the first day of October, it was announced by the provincial government today. An agreement providing for the formal transfer of the resources two months hence has been reached between the provincial and federal governments and has been signed in their behalf by Premier Brownlee and Hon. Charles Stewart, respectively. The effect of the agreement is merely to fix the cut-off date, having no relation to other terms of settlement.

In Saskatchewan Friday, Prince Albert, Sask., July 31.—(By the Canadian Press)

—Fearing formal transfer of natural resources to Saskatchewan tomorrow will end the granting of free homesteads, a "land rush" which has assumed large proportions in recent weeks, reached a climax today as dozens of those anxious to take land office here, fifteen men spent the night on the steps of the office and these were joined early by others, with the result the capacity of the local office was seriously taxed on the last day it will be officially under the crown by right of the Dominion.

MACLEOD TOWN COUNCIL

The Macleod town council met on Monday evening for the regular meeting. There were present Mayor J. Swinerton, Messrs. C. W. Stevens, Alex. McLeod, W. A. Day and Dr. O. F. Finsel.

There was very little business transacted outside of the regular routine business. The Health Officer, Dr. W. R. Haig presented his monthly report for July, which showed that the town was entirely free from infectious disease during the month.

S. Pinder was leased the house and barn at the East end of 23rd Street at a rental of \$15.00 a month. Fire Insurance on the new Skating and Curling Rink was discussed and the Insurance is being divided among the Fire Insurance Agents of the Town.

BUILDING THE SILO

In building a good silo the principal points to be considered are: The walls should be impervious, strong, smooth, and wind resistant observes the Architect of the Dominion Department of Agriculture. Attention should also be given to such points as durability, resistance to fire and frost, simplicity in construction, and low cost—both initial and upkeep. There are three principal types of silo—the monolithic concrete, the stave and the scantling, and their construction presents no particular difficulties. Complete specifications and detailed instructions with respect to the construction of silos of these types are available without charge in pamphlet No. 118 (New Series), now available through the Publications Branch of the Department at Ottawa.

Enlarging the golf ball did little good. It isn't big enough yet to be free of silly perversity.

And those that live by the sword shall perish by the sword.

IN THE ESTATE OF GEORGE PHILIP ROWE, LATE OF ARDENVILLE, IN THE PROVINCE OF ALBERTA, FARMER, DECEASED

Notice is hereby given that all persons having claims upon the estate of the above named George Philip Rowe, who died on the 23rd day of March, A. D. 1930, are required to file with the undersigned solicitor or administratrix, by the twentieth day of August, A. D. 1930, a full statement duly verified of their claims and of any securities held by them, and that after that date the administratrix will distribute the assets of the deceased among the parties entitled thereto having regard only to the claims of which notice has been so filed or which have been brought to their knowledge.

Dated this 12th day of July, A. D. 1930.

Mrs. George P. Rowe,
Administratrix,
Macleod, Alberta.
John L. Fawcett,
Solicitor for Administratrix,
21-31 Macleod, Alberta.

FOR SALE—200 BUS. GOOD Oats, no wild oats, good germination, P. Vries or see G. R. Torrence. Phone 11 Granum.

FOR SALE—16 FOOT HEAD—ar in good condition, phone 514 Granum, Mrs. Tom Narkaus.

FOR SALE — PURE BRED Berkshire Pigs for sale, apply C. E. Henker, Granum.

DAIRY NOTES

The latest summary of conditions in the Dairy industry by the Dairy and Cold Storage Branch of the Dominion Department of Agriculture affords some observations of interest:

Pasteurized butter graded during June this year amounted to 150,962 packages, an increase of 18,162 packages over the same period last year. For the year to date the 1930 figure at 288,511 is 8,024 packages ahead of last year.

Cheese graded during June this year totalled 206,178 boxes, or 17,384 boxes less than last year. The total for the year to date at 317,435 boxes is below last year, but there is an increase in the number of boxes grading "special" this year.

There was an increase of 245.66 per cent in the volume of creamery butter in storage in Canada as at June 1, 1930 over the amount in store last year on the same date; and an increase of 439.87 per cent in the volume of dairy butter in store. Creamery butter in store June 1, 1930, amounted to 10,798,828 pounds; dairy butter in store — 361,035 pounds.

Those in store the same date amounted to 6,471,834 pounds, or 38.43 per cent, less than last year.

The export of cream and milk to the United States has practically ceased since the tariff of 68 cents per imperial gallon on cream came into effect on June 18. Much of the cream formerly exported is now being made into butter.

Creamery butter production in the Prairie Provinces shows a steady increase over last year—increases during May were: Manitoba 20.5 per cent; Saskatchewan, 7.7 per cent; and Alberta 15.1 per cent over May of last year.

Correct this sentence: "When I get my first million," said the man, "I shall devote myself to the art of enjoying life."

Spring Point News

Miss K. Hoffman of Brockton is the guest of Miss K. Stones.

Miss G. Farling of Calgary is visiting Miss Joyce Jackson for a few weeks.

Rev. J. L. Wright held the service in Pincher Creek United Church, Sunday, Aug. 2nd.

H. Bratton of Spring point spent the week-end at Hazelton, the guest at the Brewster farm.

Miss M. Brown returned home on Sunday, after a short visit at Coleman the guest of Mrs. W. Lonsbury.

Misses Ellen and Maude Elgin are spending a few days in Macleod with Mrs. Jackman.

Mr. and Mrs. Brown and Mr. and Mrs. John Fisher motored to Lethbridge on Friday to attend the Fair.

Mr. and Mrs. Jackson spent last Thursday in Lethbridge attending the Fair.

Mrs. M. Waldon from Stavely returned to her home, after spending a few days at their ranch at Spring Point.

Mr. R. Reardon and Eddie motored to Calgary on Sunday to attend the wedding of son, James Reardon. The wedding was to take place on Monday, August 4th.

Miss Jean Day of Macleod spent last week at Spring Point the guest of Miss Pauline Cox.

Misses Grace and Alice Bratton are visiting a few days at Ashvale, visiting their sister Mrs. Fred Burgess.

Mrs. Ernie Risdler returned to Lethbridge, after visiting her mother, Mrs. F. Stones.

Mrs. W. Cox, entertained a few young people at her home on Friday last, a very enjoyable time was spent in games and dancing.

ST. ANDREW'S PRESBYTERIAN CHURCH

Services Sunday, Aug. 10th, 1930:

No morning service. 7:30 p. m.—Evening Worship. Conducted by Mr. McMillan, Student Missionary, Stand Off and McBride Lake Mission.

Rev. Alex. Ferguson, M. A., Minister.

CHRIST CHURCH (ANGLICAN)

Services Sunday, August 10th, 1930—(8th Sunday after Trinity):

One service only. 11 a. m.—Morning Prayer. The Rector will be away at Waterton Lakes, taking services for the day.

This service at Macleod will be taken by Mr. Wallace Cockeram, appointed Lay Reader for Christ Church.

Rev. F. Randall Powell, Rector.

THE SALVATION ARMY

Meetings as follows: Saturdays—Prayer Meeting 8:30 p. m.

Sunday—11 a. m. Holiness; 3 p. m.—Sunday School and Adult Bible Class; 7:30 p. m.—Salvation Meeting.

Officers in charge Capt. and Mrs. Weir.

REAL ARISTOCRATS

Canada's Livestock Exhibit at the World's Poultry Congress in the Crystal Palace, London, England, now in session, includes some splendid specimens of Canadian poultry.

Geese, Ducks, Pigeons and Rabbits. Avian aristocrats in every sense of the term, the poultry for this exhibit came from every province in the Dominion. It includes all the usual, and some unusual types among the latter being the Rose Comb Black Langshan (from Alberta), Silkie, and Black African Game stock.

In keeping with their status as aristocrats these avian visitors to the Fourth triennial congress of international poultry experts travelled to London via the C.P.S.S. Duchess of York in the care of skilled attendants. They are fully qualified ambassadors of good will whose presence at the Poultry Congress will redound to the credit of Canada. They will also reflect credit on the poultry breeding policies of the Federal Department of Agriculture which have done much to make the present high quality of the poultry stock possible here.

Impudence is any chance remark little Willie makes after the home team drops a double-header.

They give away razors to make you buy blades. Why shouldn't the fellow with the checking concession give you a hat?

A hick town is a place where the tourists can locate a restaurant by listening for the buzz of flies.

Empress Theater
Current Attractions

"SWEETIE" WOW; NANCY CARROLL, OAKIE, BIG HITS — THURSDAY, FRIDAY AND SATURDAY

It's here! We've waited for a long time for this sort of jazz-panic amusement—and now, at last, it's here under the very apt title of "Sweetie."

Here is everything—or rather THERE is everything; for it is showing on the talking screen for a scheduled run of three days at the Empress theatre.

Everything! Gay songs, blues songs, "torch" songs, college hymns and jazz em up, hot-step tunes; brilliant dialog; scintillating acting; gorgeous eye-filling thrill scenes and a believable plot—all this plastered lavishly on a sure enough college background lattice-work. Or perhaps we should say lattice-play, for that seems to be the philosophy of the melody-inspired youths and maidens who romp through this superb comedy-romance extravaganza.

Lookit the names—Nancy Carroll, Helen Kane, Jack Oakie, William Austin, Stanley Smith—oowah! What a cast! The works that make the world go round will spin out two days while only one was produced before, after this "Sweetie" thing gets its hold on the public's pulse.

"I DEVILS" — MONDAY—TUESDAY AND WEDNESDAY

Quinn Martin, New York World

"The genius of Murnau has wrought another film of simplicity, of eloquence and of enormous emotional appeal. This is 'I Devils'... as fine a thing in its way as has been done in Hollywood in a year."

Miss Gaylor, who improves steadily in her art, has done nothing of which she might be more proud.

Irene Thirer, New York Daily News

"See 'I Devils' by all means! You will love this new Murnau film... which holds suspense, pathos, romance, tenderness, terror, tears and, above all, humanness. It will afford you the opportunity to see again the really unsurpassable Janet Gaylor, who, of course, walks off with first honors."

Mordaunt Hall, New York Times

"Held the audience from the moment the face of a painted clown appeared to the final fade-out... It is the unflattering manner in which Mr. Murnau attacks his scenes that is responsible for this picture's greatness."

George Gerhard, New York Evening World

"'I Devils' is a winner! Little Miss Gaylor is the best thing in the picture, as she always is."

Richard Watts, Jr., New York Herald Tribune

"Miss Gaylor is so beautiful and entirely moving... that she gives the film a dignity and a gentle touching quality that prove conclusively again that she is one of the great modern players of either stage or screen."

Martin Dickstein, Brooklyn Eagle

"This latest Fox production must go down as one of the most important pictures of the last few years have brought. It is just about the finest example of celluloid art the town can offer."

Correct this sentence: "I changed to another make of gasoline," said the man, "and noticed a great difference in my car's performance."

When will good times come back? Well, when the cow is milked you just wait until she gets some more.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION — BREAST FEEDING

If the nursing mother is healthy and if she is eating the proper foods, her milk will almost surely contain all the constituents which her child requires for proper nutrition.

Breast milk meets the needs of the child in a remarkable manner. This is not surprising when we consider that it is the natural food of the infant. Breast feeding is not an entirely foolproof method of feeding, however, and in order to carry it out properly, the mother requires to give some thought to the subject.

The mother, if she intends to nurse her baby properly must attend to her general health, which, of course, includes attention to her diet. If the mother is careless as regards her own needs, she is doing harm, not only to herself but, indirectly, to her child through her milk.

The nursing mother requires fresh air, sunshine, rest and exercise in order to maintain her normal health. She should eat a well balanced diet, making sure that it includes the daily use of milk and milk products, green leafy vegetables, and fruits. Attention to the proper habits of healthy living is essential for the health of the nursing mother and her child.

She should feed by the clock. Experience has proved, beyond question, that regularity in feeding should be observed. The time for feeding is the hour set as shown by the clock, not when the mother guesses that it is feeding time, or when the baby cries. Regularity in feeding is necessary for the baby; irregularity is the cause of digestive upsets. Regularity in feeding also helps to maintain the supply of breast-milk.

No baby should be weaned unless the necessity for depriving him of his nature food has been carefully considered. Mothers, for some unknown reason, very often get the idea that their milk is not suitable. They do not know, or they have forgotten that the best artificial feeding is only a substitute and is never just as good as the natural method.

If there is not sufficient breast-milk, then the proper thing to do is to supplement the quantity there is with some artificial feeding. In this way the baby will receive the benefits of all the natural food available and is given what additional food he needs. There is no reason why the infant should not continue at the breast while he has supplementary feedings, because breast milk being so much better than none at all.

Satisfactory breast-feeding depends upon the mother's taking care of her health, particularly her diet, on her confidence and determination that she can and will breast-feed her baby, and on her resolution that she will feed with absolute regularity by the clock.

Questions concerning Health addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

INCREASED TOBACCO OUTPUT

Canadian farmers, almost entirely as a result of research work done by the Dominion Department of Agriculture, are now producing practically all the fine tobacco required by the manufacturers, and it is of a better quality than the more expensive of the tobacco hitherto imported from the United States, observes Dr. E. S. Archibald, Director of Dominion Experimental Farms. In an ever widening field tobacco production is fast attaining a position of first importance in agriculture.

Or if you don't care for miniature golf, you can use a broomstick for a horse and play polo.

Good times will come again just as soon as people earn the wages they spent last year.

Of course it's unlucky to get married on Friday. Why should Friday be an exception?

Mr. and Mrs. P. J. Doyle are spending a few days in Calgary.

Misses Doris and Eileen McManus of Kenora, Ontario, are spending their vacation with Mr. and Mrs. A. E. Skelding.

Miss Haugen is a guest of Miss Ruth Johnson for a few days.

There will be a community meeting, August 8th at 8 p. m. in the Ardenville School to discuss the building of a Community Hall, in the south district. Which is much needed for all purposes. Everybody come and help.

Mr. and Mrs. H. Bester were Waterton Lakes visitors the past week-end.

Mr. and Mrs. E. Whipple spent Sunday with Mr. and Mrs. Brown at Carmangay.

Mr. and Mrs. A. Hovis, Mr. and Mrs. W. Hovis and Mrs. Donahue are spending a week at Waterton Lakes.

Mr. Wallace Hovis, Mr. Damon, A. E. Skelding and Edgar Skelding were business visitors to Calgary last week.

Mr. W. Scott, Mr. and Mrs. R. Scott, Mr. and Mrs. B. McNeil and Elbert Skelding spent a day at Lethbridge Fair.

Mr. W. Scott has invested in a Holt Combine.

Mrs. and Miss Mackenzie spent part of their vacation with Mrs. M. Whipple.

Mr. and Mrs. Bremner were guests of Mr. and Mrs. Sackett over Sunday.

In last week's issue of The Times a local appeared which read Mrs. A. E. Skelding and Mr. W. Hovis were Lethbridge visitors. It should have read Mr. A. E. Skelding.

Correct this sentence: "I changed to another make of gasoline," said the man, "and noticed a great difference in my car's performance."

When will good times come back? Well, when the cow is milked you just wait until she gets some more.

FIRST GUESS ON BENNETT'S NEW CABINET—PREMIER EXPECT TO TAKE FINANCE HIMSELF FOR PRESENT SAYS OTTAWA PAPER — MAY TAKE OFFICE ABOUT END OF WEEK

Ottawa, Ont., Aug. 5.—With the day approaching when Hon. R. B. Bennett will announce his new cabinet, its personnel is being forecast in all parts of Canada, but particularly in Ottawa, "I wonder who will be our minister," is the oft-repeated question asked by civil servants.

The Ottawa Journal in a news page feature today carries the following:

"It is reported, in some quarters, that for the time being Mr. Bennett will himself take the portfolio of finance. Mr. Bennett, it will be recalled, held this post in the short-lived Meighen ministry of 1926.

"The various portfolios, it is understood, have not yet been allotted, but the probabilities are that the new cabinet will line up roughly as follows:

Minister for external affairs and minister of finance—Hon. R. B. Bennett.

Minister of justice—Hon. Hugh Guthrie.

Minister of railways—Hon. Dr. Manion.

Minister of public works—Hon. Arthur Sauve.

Postmaster general—H. A. Stewart.

Minister of agriculture—R. Weir.

Minister of national revenue—R. C. Matthews.

Minister of defence—Col. Donald Sutherland.

Minister of health and pensions—Col. Murray McLaren.

Secretary of state—Maurice Dupre.

Minister of marine—C. H. Cahon.

Minister of fisheries—Col. Thomas Cantley.

Minister of labor—W. A. Gordon.

Minister of the interior—Undecided (to go to Manitoba).

Solicitor general—Alfred Duranleau.

Minister of trade and commerce—Hon. H. H. Stevens.

THURSDAY, AUG. 7th, 1930

CRITICISM BY THE BLIND

One of the peculiar things about modern North America is that so many intelligent and thoughtful people do not in the least seem able to understand it.

Pick up any magazine that is devoted to something higher than stereotyped fiction and cut-from-a-pattern success stories, and you find that the prevailing note, in any article that tries to assay the current era, is one of dark foreboding or downright despair.

That is not entirely surprising. There are tendencies in modern life that are ominous enough, in all truth. But in many cases the gloomy prophets seem to have a complete misconception of our industrial civilization.

A writer in a recent issue of The New Republic, for example, remarks that we owe to

Henry Ford 'the discovery that our national welfare depends upon attaining the maximum rate of destruction of our national resources.' Then, after asserting that Ford's theory calls on us to waste things we possess as fast as possible, he comes to the question of world peace and makes this amazing statement:

"For long we have worried about war, driven by a pre-industrial feeling that war is the enemy of mankind. But by the theory of the economic value of waste we find that war is the basis of culture. War is our great economic safety valve. For if waste lets up, if people simply won't throw out things fast enough to create new needs in keeping with the increased output under improved methods of manufacture, we always have recourse to the still more thoroughgoing waste of war. An intelligently managed war can leave whole nations to be rebuilt, thus providing work at peak productivity for millions of the surviving population."

This sample of the reaction of our intellectuals to the new trend in human society fills one with a sort of stupefied despair. For we have here not only a complete misunderstanding of the doctrine of modern industry, as exemplified by Henry Ford; we have also a ludicrous misconception of industry's attitude toward the tragedy of war.

We have a right to expect something better than this. The critics of this age of industrialism ought, at least, to set themselves straight on its fundamentals. The facile optimism of the success magazines is not born of any more

shoddy thinking than the equally facile pessimism of some of our intellectuals. A tremendous change is coming upon society these days. It is coming whether we like it or not. No amount of disturbed wailing will halt it. From our intellectual classes we should be getting—not blind outbursts of peevish alarm, but a genuine attempt to understand what is happening and how we can get the most out of it. Weird remarks like the ones quoted above do no one any good.

ONE CASE DOESN'T PROVE ANYTHING

A Turkish gentleman named Zaro Agha, arriving in America, claims to have attained the age of 126, or 156, or something, while abstaining from alcoholic liquor.

This, writes a reader, "is a simon-pure proof of the harm liquor does, and Zaro is the world's greatest advertisement for prohibition."

The argument is equivalent to saying that, because one great genius lived solely on peanuts, therefore peanuts create genius.

There have been a great many centenarians who drank liquor regularly all their lives—but that doesn't prove anything, either.

There is no doubt that excessive drinking—or excessive eating, or excessive sleeping—shortens life.

But one isolated case doesn't prove anything.

THE SILVER LINING

Not that we care whether skirts go up or down—well, not much, anyway—but it's interesting to learn that about 400,000 women, members of the New York State Federation of Women's Clubs, have been on strike against long skirts.

The Garment Retailers of America heard this the other day from Mme. Helene Volke, who is official stylist for the

women's federation—and a great light broke over them. "We have refrained from buying new frocks," said Mme. Volke, "as a protest against having foisted upon us styles becoming to the young and slender."

So, it appears, women are now to make styles, instead of styles making women. If the styles "dictated by Paris" don't suit, the girls will go on wearing their old dresses a bit longer—and that's something a veteran husband and frock-provider can cheer.

WHAT SCHOOL BOYS KNOW

"Every schoolboy," says an editorial in a weekly, "knows about the golden age of Pericles, Socrates and Plato, Euripides, Aeschylus, Democritus, Anaxagoras, Aristides, Aristophanes—men like these."

We hate to be cynical, but every schoolboy doesn't know about such men.

He knows about the golden age of Lindbergh, Max Schmeling, Babe Ruth and such men as these.

It is an old legend that schoolboys are faithful students of the old Greek and Roman literature and philosophy, but the truth is that most boys never heard of Aristides or Anaxagoras—and most of them never will.

IT TAKES BRAINS

"It takes more brains to be a farmer than to be a High Court Judge" asserted J. Lockie Wilson, speaking at a gathering of Provincial Fairs Judges at the Dominion Experimental Farm, Ottawa, recently. There never was a greater need for co-operation between the scientist and the farmer than today," he also stated; adding, "the most scientific business today is farming."

Hard times: A period when you pay the debts you made in the good times.

PASTURES AND PROTEINS

The value of pastures depends very largely on the amount of proteins—green feed—available to the cattle using them. In this connection the studies of "close grazing" now being made by experts of the Dominion Department of Agriculture are of special interest. While still in the experimental stage the work already done holds much interest for the dairyman. Briefly put, the object of close grazing is to provide an adequate and continuous supply of green fodder from succulent new herbage growth. This is done through the division of a suitable field into four equal sections. While the herd grazes for a week on one section the new growth, rich in protein, is developing in the others. In this way a new pasture with three weeks growth of new herbage is regularly available.

MODERNIZING THE PEA

Field crops like styles have to keep abreast of the times. L. H. Newman, Dominion Cerealists, is always on the lookout for something new and useful in the line of field crops for the Canadian farmer; sometimes he makes new crops, and frequently he brings them up to date—this is what he is doing with the humble pea. Peas are a crop possessing high protein feed values, but one which at the present time is difficult to handle, and often uneconomical because of loss due to breaking up in machine handling and the excessive cost of harvest labour. By changing the grain of the pea and making it stronger Mr. Newman expects to produce a pea which while retaining the desirable protein qualities of present varieties will be strong enough to permit harvesting with the use of the binder. In modernizing the pea the Dominion Cerealists are in fact changing a crop.

WEALTH FROM WEALTHIES

Few people appreciate the production possibilities of an orchard. As a result of a series of studies in apple culture and orchard practices, made by experts of the Dominion Department of Agriculture, data relating to the production record of a closely planted Wealthy orchard is particularly interesting. The average net annual profit per acre from the time it was planted in 1896 to date is shown to be \$171.64. The highest annual net profit per acre was in 1923, and amounted to \$475.30, while the lowest net return of \$102.78 occurred the following year. The complete financial statement for this orchard for the latest available year shows: total expenses, \$394.25 per acre; total receipts, \$829.31 per acre; and net profit, \$464.96 per acre.

WATCH BEEF GRADING

The beef grading policy of the Dominion Livestock Branch is not only providing a real service to the Canadian consumer and producer in clearly identifying the true qualities of beef, but is also attracting attention in the British market. The Imperial Food Journal, a recognized authority on market conditions in the Old Country, says: "The introduction of beef grading in Canada, whereby the two top grades are marked for the information and protection of the public, is doing much to strengthen the demand for the better qualities of beef. This should tend to promote the raising of better grades of cattle and the finishing of animals before they are sent to market." The same authority forecasts an early return to volume exports of Canadian life cattle to Britain.

"What's in a name?" asked the bard, who didn't live to see fake jewelry made respectable by prefixing the word "costume."

How absurd to think the cave man beat up his woman! It wasn't superior strength that taught the male to outrun the female.

Now that he has achieved a boy, we shall see whether Lindbergh really is immune to swellhead.

You can say one thing for the gangster. He doesn't bring disgrace to some church organization when he's caught.

There are many good story writers still, but growers don't produce grapes when the market calls for prunes.

The country is still safe while voters refuse to support the worse of two evils merely because he is wet or dry.

Nothing is impossible in a world where two cars can obey the parking rules by stopping places every hour.

It isn't familiarity that breeds contempt for righteousness.

HUMAN FACTORY

One can compare the body to a Human Factory, says a diagrammatic chart illustrating our physical activities in a recent number of Hygeia, the Health Magazine.

This clever picture shows the brain centres for the control of thought and of the automatic functions by means of switch board devices and references in various compartments of the skull. The eye is a great camera, the ear is a radio antenna.

Nervous impulses and stimuli go forth from the brain centres via the spinal cord.

The motor system of the muscles and the network of nerves may all be seen ramifying through the great machine of the body.

Of extreme delicacy are some of the workings of the body, and yet one is amazed to find how little care is taken by the majority of people of their priceless possessions.

Teeth are allowed to decay in early life until we find many young people using dentures. Eyestrain is so common that nearly all the world uses glasses before it leaves school.

Hearts are subject to fatigue, nerves are allowed to go to pieces through insomnia. Posture of the body is neglected and one sees a poor slouch instead of a fine figure.

All of which is within our own power to remedy. Sickness is largely preventable to-day. Good Health is your birthright—Claim it.

When the oil man drills a successful hole he gets a great big hand, but you can say that for a mosquito.

If you like a Sunday picnic in a quiet place far from the crowd, you can use the front lawn.

Dumbness is necessary. If people weren't dumb enough to follow, there could be no great leaders.

DISTRICT MANAGER WANTED

A Canadian life insurance Company, established 56 years having low rates and paying good profits, desires to get in touch with a man in the district of Macleod who is well and favorably known in his community, who has an extensive acquaintance, and who would be interested in building up the business of this Company in his territory on a basis which, with the liberal contract we are prepared to offer, would return to him a very good income, increasing from year to year.

We shall be pleased to receive an inquiry (which will be treated in strict confidence) from a sincere man who is a hard worker, but who need not necessarily be experienced in the life insurance business. With such a man we are prepared to deal on a liberal basis.

Apply to—

F. W. TAYLOR, C. L. U.,
SUPERINTENDENT, WESTERN CANADA.

Mutual Relief Life Insurance Co.
315 McIntyre Block Winnipeg, Man.

Now that night baseball has arrived, we can't expect any chalance, however, comes when further innovation in the way you try to light one and the of night novelties except sleep. Lighter won't co-operate.

OVER THE WATER

No. 14, Lac Beauvert—355 yards, Par 4.

The fact that the water in front of the 14th tee of the Jasper Park Lodge Golf Course is so clear that the ball can be seen when it rests thirty feet below the surface, isn't much consolation to the player who hooks his tee shot into the lake. A well driven tee shot goes straight to the green. A hook goes straight to the bottom.

Following the long 13th hole, this hazard is one to cause anxious moments to competitors in the Canadian Amateur and Western Canada Amateur Championships at Jasper in August, and the Silver Totem Pole Tournament in September. The upper photograph shows the tee and the plan below, the hole in detail.

GRANUM LOCAL NEWS

Mr. O. A. Anderson, north of town, trotted in his Mc-Der. on a 26-40 Case Tractor.

Mr. and Mrs. H. Dimm returned home from their vacation Thursday evening.

Mr. and Mrs. B. Kellicut were guests at Waterton Lakes Wednesday.

Miss Craft and Mr. E. McFarquhar, of Macleod, were Sunday guests at the home of Mr. and Mrs. D. Cameron.

Miss Agnes Jones left last Wednesday morning for Portland, Oregon, to visit Alice Ungstead.

Mr. and Mrs. Rubra, Miss Hilda Rolland and Dave Robinson spent the week-end in the mountains fishing.

Don't forget the Saturday Nite Dance at the Reynolds Hall. Good four-piece orchestra will be in attendance.

Miss Mildred Macleod, of Seattle, is spending her holidays at the home of Mr. and Mrs. R. A. Macleod.

Mr. and Mrs. James Blair and son Kenneth returned home Wednesday from their holidays at the coast.

Mrs. D. Edwards who has been relieving at Mr. Blair's office left Sunday for Banff and Sylvan Lake, before returning to Calgary.

Mr. and Mrs. James P. Stever and Mrs. Tom Narkaus and daughter returned from their trip to Oregon, Friday last.

Mr. and Mrs. J. Blair and son Kenneth, who have been spending their summer holidays at Vancouver returned home last Wednesday evening.

Mr. and Mrs. W. B. Rogers and daughters Lois, Ruth and Bobby returned Thursday evening from their holidays, at Winnipeg and other Eastern points.

Rev. and Mrs. E. Barnes returned from their holidays at Victoria and Vancouver last Wednesday. Friends are glad to learn that Mrs. Barnes health is much improved since her stay at the coast.

Mrs. Dora Edwards left Monday morning to meet her son Ralph, in Calgary, they are planning on driving on to Portland, Oregon for their summer holidays.

Miss Lois Little, who has been teaching at Rocky Mountain House, returned home Saturday, accompanied by Mrs. G. Mitchell and children who are spending a few days visiting at her home.

Mr. Rowe is supplying at Claresholm and Staveland for the first three Sundays of August, the Claresholm service being at 11, and Staveland at 12.30 o'clock. The pastors from these neighboring towns did many kind services during Mr. Rowe's absence on account of illness last year.

Mr. George McDougall led the Bible Classes in a very able and interesting manner last Sunday morning, and will be in charge during the month of August. There are classes for all ages in the Study and Worship Hour at the United Church each Sunday morning from 11 to 12 o'clock.

Rev. and Mrs. A. H. Rowe went to Champion on Wednesday of this week to attend the wedding at high noon of Miss Gladys Woodhull and Mr. Wm. Laidlaw. Mr. Rowe being the officiating minister. Mr. Laidlaw is a merchant in the town of Cardston, and Miss Woodhull is known to all Granum people as the teacher for several years of the Granum High School.

"Hide Out" — All Talking Feature. The crashing drama of a young racketeer who uses his college career to hide his first mistake before the champion Stroke Oar and the model of clean sportsmanship. See him faced with the proposition of "throwing" the big race of the year or going to jail. Does he win? Come and learn the dramatically compelling answer. At the Starland Theatre Friday and Saturday, August 8th and 9th. Usual Admission. Also All Talking Comedy.

GRANUM, ALBERTA

Friday last, August 1st with a Picnic Hour and the serving of sandwiches, cakes, and lemonade. Prior to the refreshments had been the presentation of Certificates to all with a satisfactory record for attendance and attentiveness. About thirty certificates were given in all, by Mr. Rowe to the Primary Division, and by Miss Davis to the Intermediate-Junior Division. Upwards of fifty boys and girls attended, and much interest was shown. New songs and hymns, were learned along with Bible Memory Work, Stories, and games which appealed to all, and some very fine work was done in the manual training period. The expenses in connection with the Vacation School were about \$35, books and materials costing \$25, and \$10 being paid Miss Davis for her travelling costs. Her able work she gave freely, and it is much appreciated. If there are any friends, in addition to those who have already contributed to the cost of the Vacation School, who would like to make a gift to help defray expenses, Mr. Rowe will be glad to receive it.

ORCHARD FACTS

There could be no more useful or complete handbook of modern orchard practices than is afforded in the bulletin of that title, prepared by horticultural experts of the Dominion Department of Agriculture and just off the press. A complete compendium of information with respect to orchard practice, the bulletin covers the whole field of apple growers' problems, from the planting and training of the young tree to a synopsis of tree and fruit diseases, their treatment and control. Among the subjects dealt with are: training the young tree, maintenance of fertility; systems of cultivation; spraying; thinning; renovation of the neglected orchard; scraping, cleaning and tree surgery; insects attacking apple trees; insecticides; and important diseases of the apple. It is a little book every apple grower should have in his library.

NEW APARTMENT MODEL of World's Fastest Electric Range

NO matter how small your kitchen, this compact Hotpoint Hi-Speed Range will fit in admirably. And it offers you not only the cleanliness and convenience of electric cooking but also unsurpassed speed and economy.

Exclusive Hotpoint features include stain-resisting porcelain enamel with harmonious shades of cream white and dove grey... indestructible Hi-Speed Elements (fastest and most economical by actual test)... and sturdy All-Steel Construction.

Hotpoint Hi-Speed Ranges are priced as low as \$85 and you may buy any model on convenient terms.

A TEASER

No. 9, Cleopatra—215 yards, Par 3.

The ninth hole of the Jasper Park Lodge Golf Course, Jasper National Park, Alberta, over which the amateur championship of the Royal Canadian Golf Association will be played August 19-24 this summer, is one of the trickiest in Canada. The championship tee (No. 1) is considerably elevated and the green, which is very fast, is also built up high. The trick, therefore, is to play a tee shot which will hold the green. Yawning traps surround the green to eat up the strokes of the golfer who fails to play this hole properly. Like its famous namesake, "Cleopatra" is likely to wreck a lot of reputations at Jasper in August.

Co-incident with the Canadian Amateur Western Canada Amateur will be played over the Jasper Park Lodge Course, and this will provide plenty of competition for those whose high handicaps automatically keep them out of the Dominion event.

The upper photograph was made from No. 1 tee. Below it is a plan to scale showing the hole in detail with the three tees plainly indicated. The figures below represent the yardages.

USE OF SALT IN HAY CURING

Salt has been used in hay curing in some districts for many years. The Dominion Experimental Farm at Napan, Nova Scotia, has conducted a series of experiments since 1926 in order to deter-

mine, if possible, the value of such a practice. The procedure was as follows:

A field of good quality mixed hay was cut as soon as the dew was off. One section was tedded and raked into windrow the same day and put up in two-ton stacks the following day. The stacks were treated with salt at the rates of 10, 20 and 30 pounds per ton and one stack left untreated as a check.

The balance of the field was tedded the day after cutting and part was stacked from windrow the third day and the balance the fourth day. Each day's stacking was treated as outlined above. Another series of stacks was put up with hay that had received some rain after being partially dry.

The general results obtained during the four tests were as follows:

1. Hay stacked the day after cutting kept fairly well when salted 20 to 30 pounds per ton. Ten pounds of salt per ton aided materially in preventing the development of moulds, but did not appear sufficient.

2. Hay stacked on the second day after cutting, (or on the third day), was similar in quality to that stacked the previous day. A slight amount of mould developed in the untreated stacks.

3. Hay stacked on the fourth day was dried up to such an extent that the hay removed from all the stacks lacked the green colour noticeable in the treated hay from the other lots.

4. This was stacked while there was still some rain water in it and treated the same as the other lots. The results from the rain-on series were not conclusive. The salt apparently did not have the same effect as it did on the partly dry hay that had not been damaged by rain.

Feeding tests showed that when fed to steers receiving 30 to 40 pounds of turnips daily, the hay treated with 30 pounds of salt induced scouring to a considerable extent. With dairy cows this was not quite so noticeable.

To summarize, it was found that hay could be put up in two or three ton stacks very satisfactorily after it had received at least ten hours good drying in the sun, when treated with 20 pounds of finely ground salt, thereby preserving its colour and succulency. These various treatments also demonstrated that it was essential to have the free moisture fairly well dried out before hay could be stored in large quantities. Further work will be required to determine the degree of curing necessary to permit one to store hay in the barn in large quantities with safety.

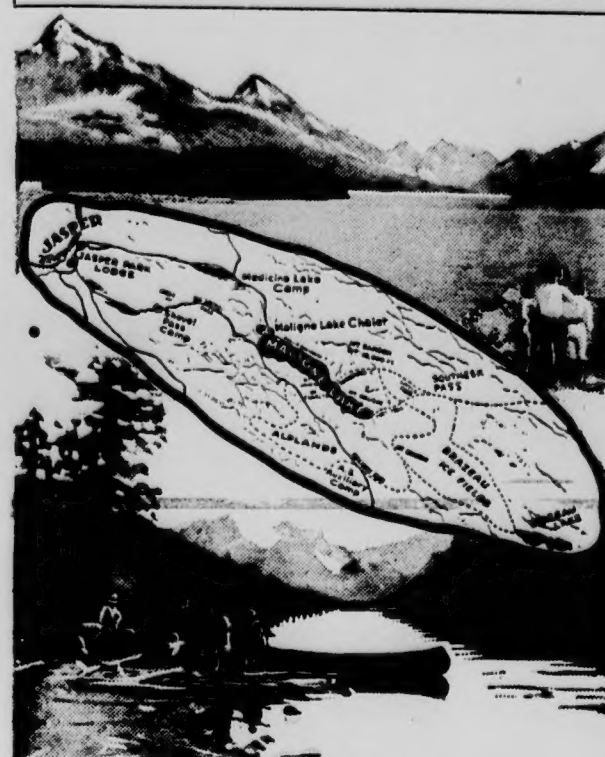

However, these tests do indicate that it is not necessary to have the hay bleached and dried out to the point that it has lost its colour and succulency, when salt is properly used. A little care in applying the salt is important. The salt should be finely ground and evenly spread throughout the move or stack, if satisfactory results are to be obtained, and from the data collected to date it is considered that 20 pounds per ton is the proper amount to use.

If you say the world will end next week, you're a fool. If you say it will end in five million years, you're a scientist.

Correct this sentence: "I'll take it" said the diffident old gentleman, "if you'll put on one of those horns that plays a tune."

Correct this sentence: "It's easy to recognize those who feel righteous," said the man, "because they are so humble and considerate."

ALPINE MEMBERS CAMP ON MOST BEAUTIFUL LAKE IN ROCKIES

WHERE year by year increasing thousands are turning to it for rest and recreation, finding among its glorious ranges and by its exquisite lakes continual stores of joy and health, Jasper National Park will be visited this summer by Alpinists to the 25th Annual Camp of Alpine Club of Canada, in the Maligne region, July 28th to August 16th. Mountain climbers from all over Canada and the United States, many of whom will have their wives—or husbands—will be in attendance, as will also a number of distinguished visitors attending the British Medical Association Convention in Winnipeg, be on hand to make the "out camp-fire" increase in interest.

To reach the main camp, the party will be conveyed from Jasper town or Jasper Park Lodge by motor car to Medicine Lake, about 20 miles; to the upper end of the lake via motor boat, and from there to Maligne Lake a distance of about 9 miles, on foot, although a limited number of riding ponies will be available between the two lakes.

The main camp will be pitched close to the mouth of Coronet Creek at the south end of Maligne Lake; directly behind the camp, tower the buttressed walls of Mount Warren (10,600 feet). The first ascent of this peak was made by Max M. Strumia and William Hainsworth in 1928, who, from their camp at the mouth of Warren Creek, at the southeast corner of the lake, also made the ascent of the Thumb (9,200 feet); also of Mt. Florence (9,750 feet). These ascents can be made from the main camp, but with the assistance of a motor boat the route can be considerably shortened.

The double ascent of Mount Mary Vaux (10,250 feet) and its outlier, Mt. Llysfran (9,000 feet), will be a popular expedition for beginners. To the northwest, another great group of mountains will claim the attention of the mountaineers, Mt. Leah and Mt. Sampson, impressive rock masses. Directly opposite them rise Mt. Charlton and Unwin, topping all other peaks in the region and heavily draped in snow and ice. Directly south of these two massive rises Amery's Mt. Julian, climbed by him and Edouard Feuz last August for the first time.

In order to climb mountains too distant to be reached from the Main Camp an auxiliary camp will be placed at the head of Coronet Creek some six miles away, and from here ascents will be made to Mt. Brazeau (11,250 feet), Mt. Valad, Mt. Henry MacLeod (10,600 feet), Coronet Peak (10,000 feet), and other unnamed peaks. There are many minor expeditions for those whose tastes lean to less strenuous activities. Trips to places bearing such fascinating names as Sunshine Falls, Pixie Valley and the Fall of the Veil of Tears are being considered.

The new Memorial Hut at Penstock Creek, in Tonquin Valley, not far from Surprise Point, Strumia and William Hainsworth will be ready for members shortly before Camp. It is about twenty-five miles from Jasper, thirteen of which can be travelled by motor on the Edith Cavell highway and the balance by trail. It is an excellent climbing centre and many members will visit this wonderful region.

Electricity and Alberta's Progress

Spanning mountains, valleys, forests, farm lands, ranges, rivers, creeks and swamps—from all parts of the province—the electric power transmission lines of this company cover over 2000 miles.

These power lines carry electrical energy from several large generating stations to 132 cities, towns and villages, lighting streets, homes, stores and offices—and lightening labor in hundreds of different ways.

Wherever it goes, this flow of electricity increases wealth, encourages industry, speeds progress, provides comforts, reduces drudgery and hardship.

C. E. TWEED

The Farm Equipment Man

House Phone 41

Office Phone 157

Wherever the Sun Shines on Waving Grain—There You Find McCormick- Deering Binders

The names McCormick and Deering have represented high-grade harvesting equipment for nearly one hundred years. During that long time these binders have gone into the fields of every grain-producing country on earth. In order to build the one best binder it is possible to produce, the Harvester Company has combined the popular McCormick and Deering grain binders into one improved, perfected machine. The McCormick's great strength and ability to withstand severe abuse and the Deering's exceptional lightness of draft have been brought together for you. And the new McCormick-Deering has additional features that were never found even on McCormick and Deering binders.

You will certainly want to get acquainted with these improvements. Check them against your old machine. Your local McCormick-Deering agent will help you by showing you the new McCormick-Deering and pointing out the features your old machine does not have. McCormick-Deering binders are built in 5-, 6-, 7, and 8-foot horse drawn sizes. Also, the 10-foot tractor binder for operation from the power take-off of the McCormick-Deering tractor.

McCormick-Deering "Big Ball" Twine

All makes of binder twine look pretty much alike in the ball. It is only when the twine starts to run through the needle of the binder that you can tell the difference between good twine and cheap twine. Then it is usually too late.

You've always known Harvester twine to be of unquestioned quality, and you've doubtless found the "Big Ball" winding (with the patented cover) a real convenience. Choose one of the Harvester brands this year for genuine twine economy and twine satisfaction. Now is the time.

McCormick-Deering Binders and Twine
